ABSTRACT

Statistical information on higher education in Missouri is presented with an emphasis on data most frequently requested by members of the Missouri Coordinating Board for Higher Education, staff of colleges and universities, state government officials, and the general public. Maps showing the location of Missouri institutions are provided along with a list of institutions by designated sectors. The areas of interest outlined by use of statistical tables are: current student enrollment data (public and independent institutions); student characteristics (public institutions); enrollment trends; degrees conferred; financial statistics (public institutions); staff; and student financial aid (public and independent institutions). Information is presented first in the form of an executive summary and then in tables. The appendix provides a classification of instructional programs, which is used in all U.S. Department of Education Center for Education Statistics surveys and is the accepted government standard for education information surveys. INTRODUCTION

Providing the framework for recommendations and the administrative policies of the Missouri Coordinating Board is a set of public policy goals for higher education. These goals include providing financial access for Missouri citizens to the system of higher education, promoting quality as defined by institutional purpose and as measured by institutional outcomes, and ensuring the efficient and effective use of state resources within the system of higher education. The Board's major strategy to accomplish these goals is to promote greater diversity among the state's higher education institutions.

This statistical summary is intended to provide information to those interested in higher education. Information most frequently requested by members of the Coordinating Board, staffs of colleges and universities, state government officials, and the general public has been included. The document contains an "Executive Summary" with selected displays and narration. Seven areas of interest are outlined by use of statistical tables in the second section of the summary: current enrollment data, student characteristics, enrollment trends, degrees conferred, financial statistics, staff and student financial aid.

STATISTICAL SUMMARY OF MISSOURI HIGHER EDUCATION

1987-1988

EXECUTIVE SUMMARY

STUDENT ENROLLMENT

Current headcount enrollment for the fall of 1987 in the public and independent colleges and universities of Missouri was 231,035; full time equivalent (FTE) enrollment was 161,822 (see Figure 3). As shown in Figure 4, of the total FTE, nearly 75 percent attend a public two- or four-year institution.

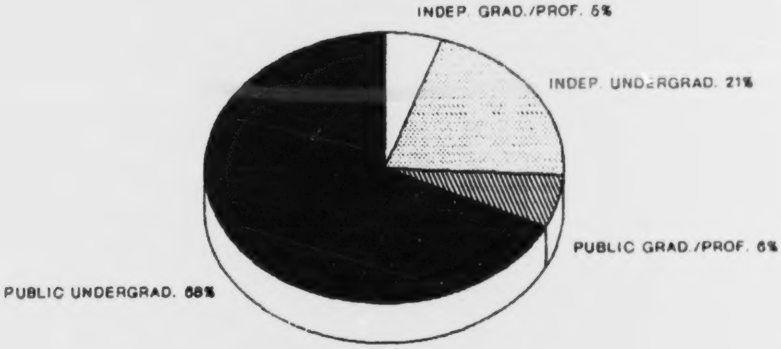
FIGURE 4.
TOTAL FTE BY LEVEL
PUBLIC AND INDEPENDENT - FALL 1987



Figures 5 and 6 depict the percentage of full-time and part-time students at Missouri public two- or four-year institutions. As expected, most students enrolled in a four-year institution attend on a full-time basis. The two most notable exceptions are Harris-Stowe and the University of Missouri-St. Louis. At the two-year colleges, almost three out of four students attend part-time.

STUDENT CHARACTERISTICS

Over 37 percent of the freshmen attending a Missouri four-year public supported institution were in the top twenty percent of their high school class (see Figure 7). At the University of Missouri - Rolla as well as at Northeast Missouri State University, over 60 percent of the freshmen were ranked in the top 20 percent of their high school class.

FIGURE 7.
FRESHMEN IN TOP 20% - FALL 1987

ENROLLMENT TRENDS 1981 - 1987

As illustrated in Figure 8, enrollment between 1981 and 1987 for first-time freshmen FTE has decreased sharply for most Missouri public colleges and universities. The largest decreases occurred with the state two-year and four-year sectors. Figure 9, displayed on the next page, indicates the enrollment trends for total FTE enrollment. It is interesting to note that although the decrease of first-time freshmen for all institutions was 17.96 percent, the decrease of total enrollment was considerably less at 3.97 percent. This suggests that there is a continuing emphasis upon serving the nontraditional student, especially at the two-year level.

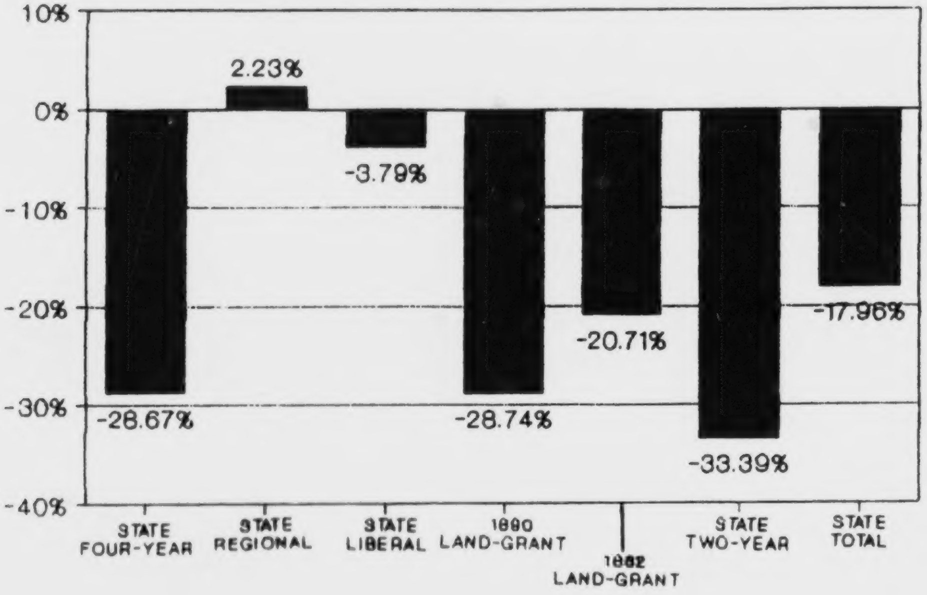

FIGURE 9.
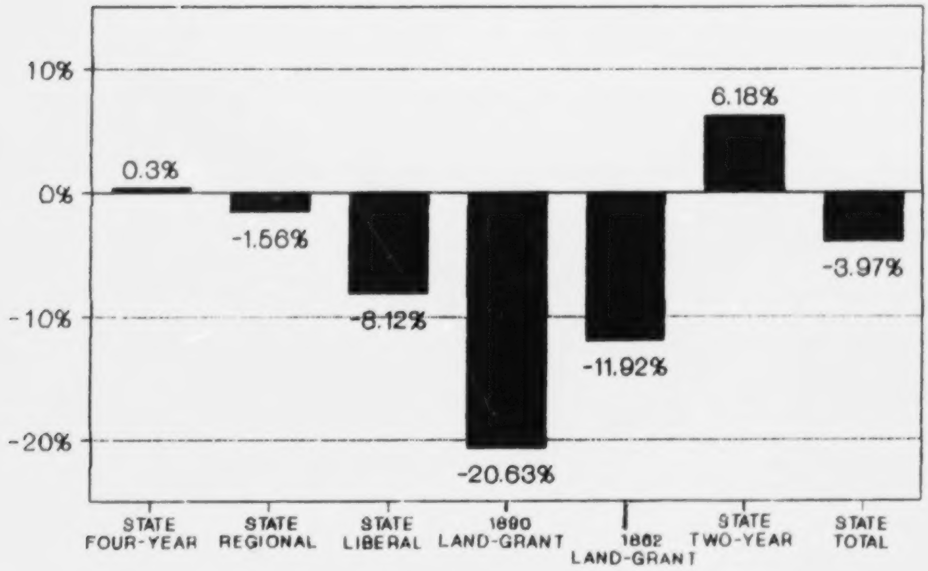
ENROLLMENT TRENDS 1981 - 1987
TOTAL FTE CHANGE



In the fall of 1987 at Missouri four-year public institutions Black enrollment accounted for 6 percent of the total student headcount, as noted in Figure 10. At the public two-year institutions, nearly 12 percent of the total student headcount is Black (see Figure 11). Although enrollment trends by institutional mission vary, from 1981 to 1987 the percent of total Black headcount at Missouri two- and four-year institutions has remained fairly stable, as illustrated by Figure 12 on the next page.

DEGREES CONFERRED

Figure 13 shows that over 37,000 degrees were awarded during fiscal year (FY) 1987 by all public and independent colleges and universities. Business related disciplines represent the largest number of degrees awarded. Degrees in engineering/science related areas were a distant second. In Figure 14, total bachelor degrees are portrayed showing again the predominance of the business related disciplines; engineering/science and social science related disciplines follow. At the master's level, in Figure 15, while business is still the dominant degree area, education is the second largest area. Figure 16 shows the heavy concentration in health related discipline areas at the doctorate and first-professional levels.

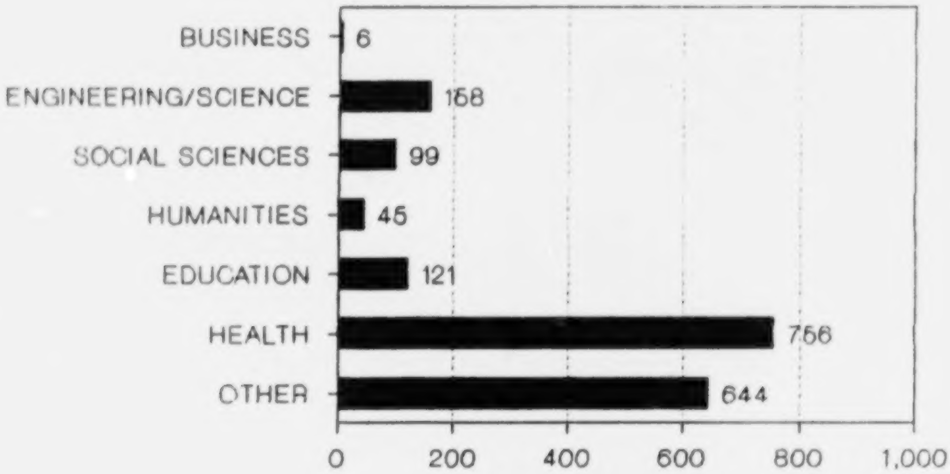
DOCTORATE AND FIRST-PROFESSIONAL DEGREES
PUBLIC AND INDEPENDENT - FY 1987



Figures 17 and 18 compare the total number of bachelor and master degrees awarded by public colleges and universities between FY 1981 and FY 1987. There were remarkable increases in the number of degrees awarded in the business and engineering/science discipline areas at both the bachelor and master's level. Notable decreases in the number of master's degrees occurred in all other categories. Overall, between FY 1981 and FY 1987 there was an increase of over 6 percent in the number of bachelor degrees awarded while there was a nearly a 9 percent decrease in the number of master's degrees awarded. Doctorate and first-professional degrees awarded between FY 1981 and FY 1987, as portrayed in Figure 19, increased in the social sciences, humanities and health related discipline areas. Decreases occurred with business, education and other areas.

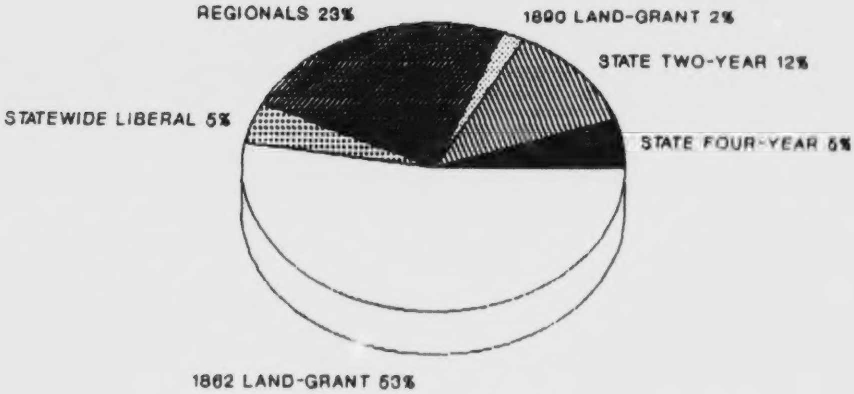
FINANCIAL STATISTICS

State appropriations for operating expenses (see Figure 20) at Missouri two- and four-year public institutions for FY 1987 totaled more than $417,000,000. The greatest percentage of that total (53 percent) was distributed to the University of Missouri System, which includes the Columbia, Rolla, St. Louis, and Kansas City campuses. Missouri public regional universities received the second largest with 23 percent of the total higher education dollar "pie".

FIGURE 20.
STATE APPROPRIATIONS - FY 1987
PUBLIC TWO- AND FOUR-YEAR



TOTAL: $417,358,878

Over $720,000,000 from all revenue sources was spent by Missouri two- and four-year public institutions in fiscal year 1987 (see Figure 21). Instruction and Academic Support accounted for nearly 60 percent of the total expenditures. Administration expenditures accounted for 10 percent. Figure 22 shows the average 9-month faculty salaries by sector and the ratio of FTE students to 9-month faculty. Although state appropriations affect faculty salaries, the more important factors are the priorities and resource allocation decisions made by the institutions. As an example, the decision regarding student faculty ratio directly affects faculty salaries.

STUDENT FINANCIAL AID

Student financial aid for fiscal year 1987 totaled over $174,000,000 for students at Missouri public colleges and universities (see Figure 23). Of this total, 69 percent came from Title IV Federal Funds which include Pell Grants, Supplemental Education Opportunity Grants, PLUS Loans, Guaranteed Student Loans and College Work-Study Programs. As shown in Figures 24 and 25 on the next page, a total of 67,798 need based awards averaging $3,286.72 each were distributed statewide during FY 1987 at Missouri colleges and universities.

CLASSIFICATION OF INSTRUCTIONAL PROGRAMS (CIP)

The Classification of Instructional Programs (CIP) was developed by the U. S. Department of Education's Center for Education Statistics in 1979-80. CIP is a taxonomy for instructional programs at all levels. It is used in all Center for Education Statistics' surveys and is the accepted government standard for education information surveys.

On the following pages, the first two columns are labeled "CIPCAT" and "Category". These refer to 20 categories the Coordinating Board for Higher Education has developed to facilitate data analysis and reporting.
